

Comfortably Digital

Aching shoulders
after working on a computer all day?

Stiff neck after using
your tablet device?

Eyes blurry and sore after staring
at a screen too long?
Then you can't sleep at night?

Mouse pointer and text too small?

Spend an hour finding out how to make the 21st century digital world more comfortable - all ages and abilities welcome! Recommended if you're learning about using digital as an individual or working in a business.
